# About Us

A little about the owner

It all started in the 90's when I overplucked my brows to be like Gwen Stefani... little did I know that overplucking would lead to sparse brows as I aged. It wasn't until I discovered permanent makeup that I truly found my passion. After getting my brows done I was transformed into a NEW woman!!! I had confidence, I had increased self-esteem and LOVED MY BROWS. I felt amazing and it was that exact day that I wanted to help other women feel the same. So I did!

4 years and 4 certifications later I have performed hundreds of services and wake up loving every day looking forward to helping my clients feel more confident.

# THE PROCESS

## Permanent Makeup

Appointments can range from 2-3 hours

### 1. CONSULTATION

Before we do any services I want you to feel 100% comfortable and confident so this is where we answer all of your questions so we are on the same page.

### 2. SHAPING

We will discuss your bone structure, check out your dream brow photos and map out your best brows for your face and you will be able to fine tune it to perfection.

### 3. COLOUR & INK

Next we will blend and create the perfect color, get you numbed up and begin your service. Don't worry, you should feel little to NO PAIN during the entire appointment.

### 4. PERFECTING SESSION

After about 4 weeks from your 1st session you will be fully healed and will come back for your perfecting touch-up session.

# FAQ

## Does it hurt?

Permanent Makeup is a form of tattooing and I know many of us associate great pain with a tattoo BUT that is just not the case with the modern advances in permanent makeup. For starters our tools and ink are very precise and create the least amount of trauma possible and you will be happy to know that we also use numbing agents to be sure your service is the most comfortable as possible with little to NO pain at all.

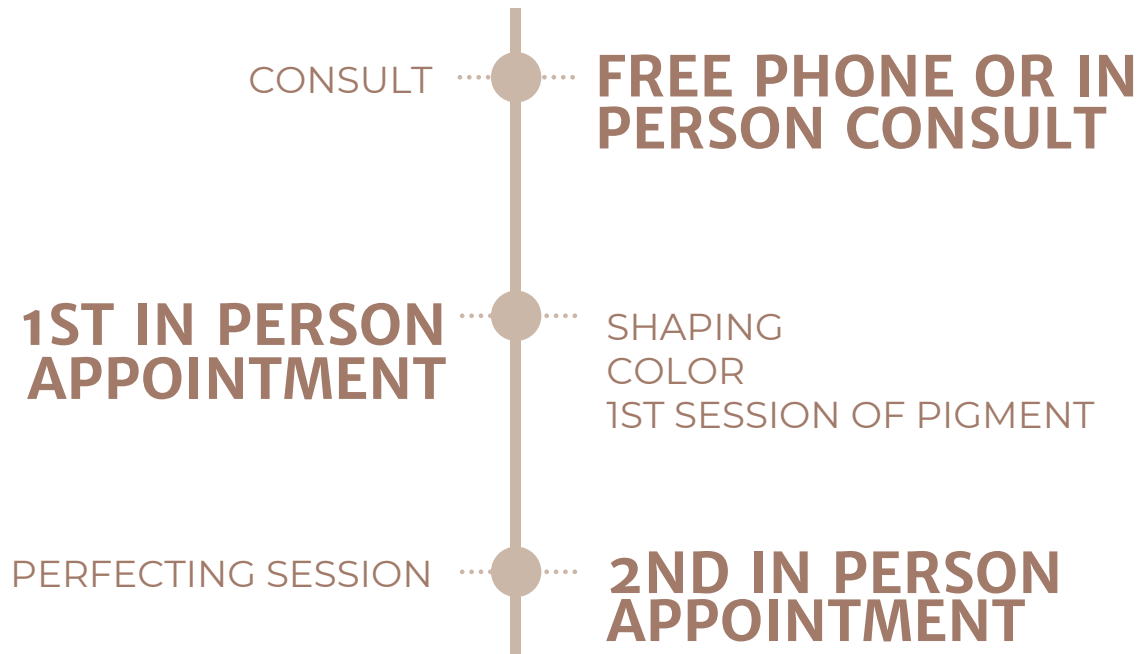

## Do you shave my eyebrows?

NO we do NOT shave off your eyebrows. We will however spend some time mapping out your best eyebrow shape and removing any surrounding hairs via plucking to show you your new shape.

## How long is the down time?

As with any service we want to know how long in the healing time. With permanent makeup we are implanting ink under the layer of skin and creating a wound. The healing process takes about 4 weeks but you can return to work the very same day with almost NO noticeable wound at all. Be warned your co-workers may notice your incredible new makeup!
